

Automatic dropseals

Mini catalogue | 3rd edition

athmer

“Good doors deserve first-class seals - good customers deserve first-class service”

athmer, based in Arnsberg-Müschede, is the leading international manufacturer of sealing and finger protection systems for doors and gates. Automatic drop seals from athmer comply with the recommendations for barrier-free and sustainable construction. The seals are mainly used in buildings such as hospitals, office buildings and schools. Special seals for all-glass or sliding doors round off the range. The longevity of the products plays an important role in counteracting the prevailing obsolescence. The owner-managed medium-sized company has more than 60 years of experience in the field of automatic drop seals and is part of the Julius Cronenberg Sophienhammer (JCS) group of companies. In addition to the approximately 100 employees, whose number has risen continuously in recent years, a modern

machine park and a constant will to innovate guarantee market success. The comprehensive range for professional sealing systems for doors and gates is designed for demanding tasks in the construction sector and offers sealing systems for sound, smoke, fire and radiation protection doors. To guarantee both high product quality and fast delivery times, athmer is represented at a total of six locations in Europe and Asia. Ecological agreements are the basis for good and responsible cooperation.

The success of the company is a combination of expertise and quality and enables the continuous development and improvement of its product range. Offering the widest range on the market, athmer has the right product for practically every type of application. In addition

to automatic door seals for acoustic, smoke and fire protection doors, the range also includes seals for radiation protection doors, all-glass doors, doors with extreme gaps > 50 mm, screed separations, thresholds, brush seals, frame seals and finger protection systems.

For athmer, the optimal ease of use of doors has traditionally been at the top of the product development agenda. Today we see that the requirements for barrier-free planning and construction are becoming more and more important. With athmer sealing systems, door manufacturers and builders are on the safe side when it comes to accessibility. This applies to our standard systems as well as to individual solutions that we develop together with our customers.

Our history

athmer has been the leading global specialist in the design and manufacture of high performance sealing and finger protection systems since the 1950's. From our headquarters in Arnshausen, Germany a continued focus on development and innovation has facilitated our emergence as the premium choice in complete door sealing systems. athmer is part of the JCS (Julius Cronenberg Sophienhammer) group of companies. The group was founded in 1711 and recently celebrated its 300th anniversary. Its headquarters remains on the same site – the old So-

phienhammer forge – it purchased in 1870 and its operations have grown sustainably ever since, with the group now incorporating 10 companies. The family-owned group is now in its 10th generation and first made a name for itself in the late 19th Century as it developed the first branded scythe, a popular agricultural tool of the period. The emergence of more modern agricultural techniques in the mid-1950's gave the group an opportunity to diversify into new markets, leading to the registration of the Kaltefeind® brand and the birth of athmer. Today both

the Kaltefeind® and Schall-Ex® brands are synonymous with automatic drop seals and athmer has built on this experience by widening its field of expertise to perimeter sealing. Having made several investments worldwide, we have expanded our operations into the Middle East and throughout South East Asia, including China and India. With a new global presence we hope to offer a more targeted product offering and more personalised service level to the individual regions.

Research & Development Competence

The research and development process is of vital importance when launching new products. A thorough development process will ensure a smooth product launch and continued fitness for purpose. This is critical in today's world where innovation needs to be integrated efficiently and without error. Failure to do so can lead to timely and costly delays. With many

years' experience and more than 150 patents worldwide, this process is a key competence of ours. Our focus has always been on innovation and how we can adapt our products to better suit our customer's requirements. We have a dedicated team of engineers and technicians offering a pragmatic approach to problem solving. They are well-equipped to undertake a full

suite of development processes in-house, including 3D modelling, 3D printing and the pre-testing of materials. We actively engage with our customers to gain feedback and improve our current product range. It is our adaptability in an ever-changing market that has established us as pioneers in sealing technologies.

Technical Centre Services

Our curiosity for innovation naturally led us to the creation of a 900m² Technical Centre located on site in Arnsberg, Germany. This facility offers us an invaluable resource during the pre-testing phase of a new product's development. In addition to this, we can now offer testing services as a fully established partner of the world-leading test institute ift Rosenheim, whom independently calibrate our facilities in

line with their accreditations. We are able to offer the following services:

- Full-scale acoustic testing in accordance with EN ISO 10140-2 & EN ISO 717-1
- Full-scale, temperature-controlled smoke testing in accordance with DIN 18095 & EN 1634, up to 200°C

→ Full-scale, pressure-controlled weather testing in accordance with DIN EN 1026 & 1027, up to 700Pa

→ Full-scale cycle testing in accordance with EN 1191 & DIN 4102-18

→ Full-scale security testing in accordance with EN 1628, EN 1629 & EN1630

Our commitment to quality & sustainability

Athmer is committed to both quality and sustainability and this has been internationally recognised by test and certification institutes worldwide. Copies of all certification can be supplied on request.

Emirates Green Building Council (EmiratesGBC) was formed in 2006, with the goal of advancing green building principles for protecting the environment and ensuring sustainability in the United Arab Emirates.

Wherever you see this logo our products have been evaluated under Warrington-fire's CERTIFIRE scheme. CERTIFIRE is an internationally-recognised, independent third-party certification scheme that assures performance, quality, reliability and traceability of products and systems.

Wherever you see this logo our products have been evaluated under the UL Mark – the most widely recognised and accepted evidence of a product's compliance with U.S. & Canadian safety requirements. The mark is one of the most valued product safety symbols worldwide, including Asia & the Middle East.

Wherever you see this logo our products have been cycle tested by MPA NRW in Germany. MPA NRW is a publically-owned test institute that was founded in 1947 and they have provided us with third-party certification as evidence of our seal's durability. Although the durability of all our products is extensively and frequently tested internally, many have also been independently verified under this certification.

Wherever you see this logo our products are covered by an Environmental Product Declaration (EPD) in accordance with EN ISO 14025 and EN 15804. The EPD is further evidence of our wider commitment to sustainability and permits our product's use in certified Green Buildings across the world. Additionally, we have developed a CO² calculator to help users understand the tangible environmental benefits of fitting Athmer seals to their buildings. You can access it via co2ool.info.

REBATED DROP SEALS for timber doors

A range of automatic drop seals for timber door applications. Drop seals are fitted to the bottom of the door and are designed to drop automatically when the door is closed to form a seal with the floor. The seal then retracts when the door is opened to ensure the door operation is unhindered. Their main purpose is to provide an effective barrier against sound transfer but they also protect against dirt, dust and smells. We have tested options for smoke, rain and even radiation.

Schall-Ex® L-14/35

KEY FEATURES

- sound reduction of 51dB over a 7mm gap
44dB over a 12mm gap
- parallel actuation & self-levelling mechanism
- removable actuator deactivates automatic function during the construction phase
- seal can be easily adjusted by hand

DIMENSIONS/ FITTING TOLERANCES

Schall-Ex® L-14/35 EK groove width: 14 mm

DATA

Application

- at the threshold of hinged, single action timber doors

Gasket material

- self-extinguishing, flame retardant silicone

Travel

- 20 mm

Fixing

- rebated into a groove in the door
- screw fixed both sides

Performance

- Certifire
- UL
- MPA certified: 1,000,000 test cycles
- EPD

Standard lengths

- 635, 735, 835, 935, 1035, 1135, 1235 mm

Minimum/ maximum lengths

- 235 mm (cannot be shortened) / 1635 mm
- can be shortened: 125 mm from 833 mm lengths

Schall-Ex® L-15/30 Pivot

complete sealing system for modern pivot point doors

- for double-action, timber pivot doors
- effective sealing against sound, smoke, draught and smells
- concealed automatic drop seals for top and bottom of the door
- vertical magnetic seals for both sides, very low operating forces
- special roller actuator suitable for use with scalloped frames
- can be combined with many common metal fittings for pivot doors
- suitable for pivot door leaves up to 2000mm wide x 3000mm high
- drop seals are positioned off-centre
- door thickness must be determined according to thickness of pivot fitting and drop seal

groove width: 24 mm

Stadi L-24/20 OS
groove width: 24 mm

Stadi L-24/20 TS
groove width: 38 mm

Stadi LD-24/20 WS
groove width: 24 mm

DATA

Application

- at the threshold of hinged, single action system doors

Gasket material

- self-extinguishing, flame retardant silicone

Travel

- 16 mm

Fixing

- rebated into a groove in the door
- screw fixed both sides

Performance

- Certifire
- UL
- MPA certified: 1,000,000 test cycles (200,000 for LD versions)
- EPD

Standard lengths

- 750, 900, 1050, 1200 mm

Minimum/ maximum lengths

- L-24/20 WS
 - 230 mm (cannot be shortened) / 2000 mm
 - can be shortened: 150 mm (either side)
- L-24/20 OS/ L-24/20 TS
 - 230 mm (cannot be shortened) / 3000 mm
 - can be shortened: 150 mm
- LD-24/20 WS
 - 635 mm (cannot be shortened) / 1600 mm
 - can be shortened: 150 mm

Accessories (included in delivery)

- L-20/20 WS / LD-20/20 WS (5104)
- L-20/20 OS (5503)
- LD-20/20 OS (5428)

Art. No.

- L-24/20 WS(1-938)
- L-24/20 OS (1-959)
- L-24/20 TS (1-960)
- LD-24/20 WS (1-951)

No CF 5675

Flushbolt

DIMENSIONS/ FITTING TOLERANCES

TK-15/T
250 mm
TK-20 II
274 mm

KEY FEATURES

- matching top and bottom versions available
- continuous seal around bolt maintains optimal acoustic performance
- 8 mm diameter bolt, 15 mm throw
- made from stainless steel
- machining of seal prepared by Athmer before delivery
- same milling dimensions at head and threshold of door

DATA

Application

- at the head and threshold of hinged, single action double system doors

Material

- stainless steel

Fixing

- rebated into a groove in the door, screw fixed

Size

- TK-15/T
→ 17x250 mm
- TK-20 II
→ 17x274 mm

Article numbers / compatibility

	Art. No.	compatibility

SURFACE MOUNTED DROP SEALS

for timber and system doors

A range of automatic drop seals that are surface mounted to timber, metal and glass doors. Drop seals are fitted to the bottom of the door and are designed to drop automatically when the door is closed to form a seal with the floor. The seal then retracts when the door is opened to ensure the door operation is unhindered. Their main purpose is to provide an effective barrier against sound transfer but they also protect against dirt, dust and smells. We have tested options for smoke.

Schall-Ex® L-15 FS

KEY FEATURES

- sound reduction of 52dB over a 7mm gap
50dB over a 12mm gap
- parallel actuation & self-levelling mechanism
- removable actuator deactivates automatic function during the construction phase
- seal can be easily adjusted by hand

DIMENSIONS

Schall-Ex® L-15 FS

DATA

Application

- at the threshold of hinged, single action doors

Gasket material

- self-extinguishing, flame retardant silicone

Travel

- 20 mm

Fixing

- screw fixed to the face of the door (closing face only)

Performance

- Certifire
- UL
- MPA certified: 1,000,000 test cycles
- EPD

Standard lengths

- 805, 930, 1055 mm

Minimum/ maximum lengths

- 235 mm (cannot be shortened) / 2335 mm
- can be shortened: 125 mm

Accessories (included in delivery)

- 5314

Art. No./ finish

- silver-coloured, anodised C-0 (1-884),
- stainless steel-coloured, anodised C-31 (1-885),
- powder coated white RAL 9016 (1-888)

No CF 5675

NADI®

- Designed for upgrading the smoke and acoustic performance of existing doors
- Smoke tested in accordance with EN 1634-3 (up to 200 degrees and at 50Pa)
- Can be fitted to fire doors (MPA NRW approval available)
- Large tolerance compensation of up to 10mm ideal for warped doors (optionally 14mm – ask for details)
- Suitable for installation onto flush or rebated, single or double doors of any material
- Can be used with a rebated drop seal or with the Schall-Ex L-15 FS as pictured
- “Snap-on” cover plate, elongated screw holes and pre-formed corners for fast, convenient installation

DROP SEALS

for glass doors

A range of automatic drop seals that can be either designed into or surface mounted to glass doors. Drop seals are fitted to the bottom of the door and are designed to drop automatically when the door is closed to form a seal with the floor. The seal then retracts when the door is opened to ensure the door operation is unhindered. Their main purpose is to provide an effective barrier against sound transfer but they also protect against dirt, dust and smells. We have tested options for smoke.

Schall-Ex® GS H-8/12

KEY FEATURES

- Sound reduction of 43dB over a 7mm gap
41dB over a 10mm gap
- self-levelling mechanism
- seal can be easily adjusted by hand

DIMENSIONS/ FITTING TOLERANCES

Schall-Ex® GS-H8/12
glass thickness: 8-12 mm

DATA

Application

- at the threshold of hinged, single action glass doors

Gasket material

- self-extinguishing, flame retardant silicone

Travel

- 12 mm

Fixing

- bonded with builder's adhesive (not supplied)

Performance

- MPA certified: 1,000,000 test cycles
- EPD

Standard lengths

- 708, 833, 958, 1083, 1208 mm

Minimum/ maximum lengths

- 235 mm (cannot be shortened) / 1335 mm
- can be shortened: 125 mm

Accessories (included in delivery)

- 5550

Art. No./ finish

- silver-coloured, anodised C-0 (1-817),
- stainless steel-coloured, anodised C-31 (1-818),

Schall-Ex® GS-A, Slide GS-A

KEY FEATURES

- sound reduction of 43dB over a 7mm gap
- 41dB over a 10mm gap
- self-levelling mechanism
- seal can be easily adjusted by hand

DIMENSIONS/ FITTING TOLERANCES

Schall-Ex® GS-A
glass thickness ≥ 6 mm

Schall-Ex® Slide GS-A
glass thickness ≥ 6 mm

DATA

Application

- GS-A: at the threshold of hinged, single action glass doors
- Slide GS-A: at the threshold of sliding glass doors

Gasket material

- self-extinguishing, flame retardant silicone

Travel

- 11 mm

Fixing

- self-adhesive

Performance

- GS-A
- MPA certified: 1,000,000 test cycles
- EPD

THRESHOLDS

A range of aluminium and stainless steel threshold plates for use on door sills. These products can help correct floor unevenness and alleviate the effects of different floor types between rooms. They also provide an optimum sealing surface for our drop seals to seal against.

Aluminium thresholds

KEY FEATURES

- recommended for optimal acoustic performance
- range of options for use with both carpets and tiled floors
- low profile, suitable for disabled access
